

Móz Digital Printing Requirements

Please provide highest resolution file possible in RGB color. Minimum resolution required is 150 dpi. In general, the greater the amount of detail in the image, the higher the resolution necessary for the final output.

When possible, please provide artwork that is the actual size of the final design. For example: if the final panel size is 48" x 120", the best quality image output would be realized with a file that is 48" x 120".

Files can be submitted via email or file transfer - see information below. Please submit all images flattened.

Art Requirements

We can accept the following file types: • pdf • jpg • tif • eps

Applications

Digital Hi-Res offers endless possibilities for creating an original feature in a space. Draw attention by tiling large panels together or use a single panel for a seamless presentation.

Limitations

When printing white, we can only achieve an opaque color (no grain). If majority of the art is white, no grain pattern is available what so ever on the panel. We cannot provide white as a spot color, instead it can be clear to expose the metal behind.

When printing black on larger runs, we can cover up to 30% of the panel. Any more than 30% coverage we could explore a mix of painted and printed panels to achieve the same look. Please submit your artwork to our team to review.

Material & Dimensions

- Standard printable size is 4'x10' (5'x10' maximum)
- Solid Aluminum .040" thick or Perforated Aluminum .063" thick (up to .125" for both)
- Aluminum material specification is 5052 / ASTM B209
- Aluminum sheets are 80% post-industrial recycled material contributing to LEED 2.0 MR Credit 4 recycled content

Colors, Patterns & Finishes

- Recommended patterns: Bamboo, Clouds, Coarse, Fog, Kelp, Pinstripe, Ripples and Waves
- Custom Colors, Patterns and Gradients
- All Móz finishes are available: Polycoat Matte, Polycoat Gloss, Exterior

Products

- Wall Panels / Columns / Room Dividers / Dimensional Walls / Wayfindings / Móz Art

Proof Approval

1. Approval of a pdf proof is required for all digital print projects.
2. Printed samples will not be processed until the final full size artwork is submitted and approved by Móz.
3. Two copies of the printed sample will be made; one will be sent to the client for approval and the other will be retained by Móz for reference.
4. The printed sample must be signed and returned to Móz before production of the order can begin. A photo of the signed sample is acceptable.

Notes

1. Images smaller than the standard panel size are acceptable. Please note the final dimension when sending the file. The bleed requirements still apply.
2. "Up-sizing" lower resolution images to the required resolution will result in aliased or fuzzy images. Móz's printing processes do not alter the resolution; the finished panel will be comparable in quality of the original image.
3. All efforts will be taken to match Pantone® colors, however Móz cannot match colors exactly. The digital print product is inherently translucent resulting in colors less vibrant than on an opaque white background.

Quality Control

Images may appear different in color from monitor to monitor and/or monitor to metal. The choice of metal grain and finish can alter the color as well.

Our media is aluminum. These aluminum sheets have a specific coating applied. As part of the metal fabrication and applied coating process, the metal may contain small divots or bumps.

We inspect each sheet for imperfections. Where possible, we will not include these in the order. Where not possible, we will try to position the imperfections in the least obtrusive part of the installation. We cannot remake printed metal due to these imperfections. These imperfections are part of the manufacturing process.

Please note, when handling or hanging printed metal with square corners, please secure the metal to the wall and handle with care.

Terms & Conditions

1. Copyright permissions - The customer agrees to have the rights on all the copyrightable material used in the file.
2. Color - Due to the nature of the manufacturing process, color and clarity may vary slightly from the file or color reference provided.
3. Graphic quality resulting from customer file - Variations in graphic quality due to differences in the digital files are the customer's responsibility.
4. Image Quality. The quality of any individual image and consistency between multiple images is the responsibility of the customer.
5. Color Variation: the sample provided by Móz, accepted and signed by the customer, will be the standard to which all prints are matched to, however Móz cannot guarantee exact duplicates as slight color or clarity variations may occur.
6. Móz Print samples are valid for 30 days and must be accepted and returned within that period.

File Transfer to Móz Designs

1. Please submit your artwork through the following link:
