

**MÓZ DESIGNS GRADIENTS COLLECTION HIGHLIGHTED
WITH IRIDESCENT TONES, TEXTURAL GRAINS**

OAKLAND, CA

available in the Móz Designs Gradients Collection of metal panels for architectural applications. Each

Nine iridescent spectrums of graduated color tones are

color spectrum transitions from light to dark on the solid core aluminum sheets.

The Collection is also enhanced with a choice of nine textured Móz grains that add visual interest and dimension to the iridescent surfaces. Design possibilities are nearly limitless with the combination of colorways and grain patterns.

Gradients is designed for use as wall coverings and columns, ceilings, canopies, room dividers, in elevator cabs and other installations. The material is available in 4' x 8' or 4' x 10' aluminum or corrugated aluminum sheets or as finished products, such as canopies or room dividers.

Thicknesses range from .040" to .125". The metal panels

can be installed vertically or horizontally, and custom colorways are also offered.

Gradients is fabricated from recycled aluminum, contributing to LEED 2.0 MR Credit 4 – Recycled Content. The sheets are recyclable when product life is ended. Polycoat gloss and matte finishes are available for minimal maintenance.
