

Aruba's Queen Beatrix International Airport

When Claudia Ruiz-Vasquez of ArteSano Design was selected to update the tone of Aruba's Queen Beatrix International Airport, she turned to the Móz to help her design and fabricate unique airport features with a Caribbean flair.

These new features included a new entry canopy, multiple columns and counter covers, pedestrian archways, free floating mobiles, flight monitors, and more, including lively wall art.

"The Aruba airport was a large-scale project with a mix of ready-to-install products and custom features," says Tripp Sandford, Executive Vice President at Móz.

About Móz

Móz designs and fabricates architectural metal products out of Oakland, California. Our collection of sophisticated materials—including metallics, gradients, patinas, and bold colorways—are the result of continuous experimentation with cutting-edge tools, digital imagery, handcrafted engravings, and laser cutting equipment.

Our team redefines metal surfacing using a unique balance of color, texture, and grain to make architectural metal products crafted for industrial, commercial, and residential markets—from large-scale corporate projects to one-off surface applications. Our innovative solutions and dedication to customer service help our clients achieve their designs through quality materials
