

Modern Metal Details at the Revere Hotel Theatre

The grand metal wall features at the Revere Hotel Theatre bring modern manufacturing, materials, and intrigue to the Boston Theatre District.

Theatre 1 at the Revere Hotel opened in April 2012 in Boston's historic Theatre District. This ultra-luxe cinema and live event space is a modern renovation of the Stuart Street Playhouse, a former landmark in Boston's thriving theatre scene. With 225 seats and state-of-the-art technology and amenities, Theatre 1 plays host to a myriad of film screenings, premieres, and festivals in addition to numerous corporate presentations, meetings, and conferences.

New York interior design firm, BBG-BBGM, sought out the expertise of MóZ to create the iconic floor-to-ceiling wall features on display at Theatre 1. The aqua Patina panels made from solid-core aluminum metal mimic the theatre's decorative textiles and replicate the appearance of a blue velvet curtain. The adjacent bronze grates span 8 feet wide, 20 feet high, and 1/4 inches thick, showcasing intricate laser cut-outs by MóZ's own custom fabrication.

About Móz

*Revere Hotel Theatre featuring
Laser Cut and Patina Metals*

Móz designs and fabricates architectural metal products out of Oakland, California. Our collection of sophisticated materials—including metallics, gradients, patinas, and bold colorways—are the result of continuous experimentation with cutting-edge tools, digital imagery, handcrafted engravings, and laser cutting equipment.

Our team redefines metal surfacing using a unique balance of color, texture, and grain to make architectural metal products crafted for industrial, commercial, and residential markets—from large-scale corporate projects to one-off surface applications. Our innovative solutions and dedication to customer service help our clients achieve their designs through quality materials
