

## Custom Perforated Columns at Wells Fargo

---

Wells Fargo at 333 Market Street in San Francisco, California features two custom perforated metal columns showcasing Móz's expert fabrication capabilities.

Wells Fargo is an American international banking and financial company headquartered in San Francisco, California. The bank's location at 333 Market Street is nestled in the heart of San Francisco's Financial District, home to the city's largest concentration of corporate headquarters, law firms, insurance companies, real estate firms, banks, and other financial institutions. All six Fortune 500 companies—Wells Fargo, McKesson, PG&E, Gap, Charles Schwab, and Salesforce—are located in this district.

For the lobby design of the Wells Fargo Bank at 333 Market Street, designers asked Móz to fabricate two square columns with a custom perforated pattern. The Graphite color provided a cool metallic tone to offset the rich woods and warm accent colors, while the brushed Fog grain and Polycoat Matte finish created a soft, muted surface texture.

Móz columns offer a beautiful way to cover essential structural elements, using a decorative metal surface with affordable price options, hundreds of colors, patterns and finishes. Móz's simple specification process makes it easy to choose options that best fit your project's budget and installation environment. Square columns are available in sizes from 12" to 60", can be square or rectangle, fabricated in four or eight sections, and can cover any height using stacked segments. The finished product comes ready to anchor to a metal stud, providing easy-to-assemble solutions for corporate environments, such as Wells Fargo.

## About Móz

Móz designs and fabricates architectural metal products out of Oakland, California. Our collection of sophisticated materials—including metallics, gradients, patinas, and bold colorways—are the result of continuous experimentation with cutting-edge tools, digital imagery, handcrafted engravings, and laser cutting equipment.

Our team redefines metal surfacing using a unique balance of color, texture, and grain to make architectural metal products crafted for industrial, commercial, and residential markets—from large-scale corporate projects to one-off surface applications. Our innovative solutions and dedication to customer service help our clients achieve their designs through quality materials.
