Design possibilities: Móz Designs expands Laser Cut metal collection

by Mick Tan | Oct 9, 2018 1:07am

Oakland-based Móz Designs added 16 new designs in its Laser Cut metal collection. The new patterns range from botanical prints to a collection of geometric shapes, thereby opening up a new world of design possibilities. In total, the Laser Cut collection can be used on columns, partitions, walls and exterior facades.

Móz Laser Cut metals come in standard 4' x 8' aluminum sheets with a thickness of 3/16". Custom sizes are available. Designers also have the ability to customize the size and shape of the metal cuts and can select from a collection of colors and grains including gradients, metallics, neutrals and standard powder coatings to achieve a variety of interior and exterior design goals.

The 27 Laser Cut patterns now offered by Móz Designs span across six different categories including Dots, Linear, Geometric, Movement, Botanic and Organic.
