Installation Instructions
Móz Tides - Ocean Waves System

Ocean Waves is a complete engineered, easy-to-install system consisting of varying widths of decorated and rolled 32-inch and 44-inch panels that are attached to the wall using a steel Snap Bar system. Ask about other products available in the Móz Tides System.

Each Ocean Waves Kit includes:
A  MT100 End Snap Bars (2)
B  MT110 Mid Snap Bars (varies per order)
C  Drywall Anchors with Fasteners - (number varies per order)
D  Ocean Waves Panels - Ins and Outs

Additional tools needed for installation:
E  Stud finder
F  4 foot long (or longer) level
G  Tape measure
H  Pencil
I  Electric drill
J  Ladder or lift device

For complete technical information, detailed drawings, installation information or other technical information, please call (510) 632-0853 or visit mozdesigns.com/spec_library.html.

For more information on other products and custom options from Móz Designs, please contact us at (510) 632-0853.

In case of damage to any of the panels, simply contact a sales representative at (510) 632-0853 to obtain a replacement. Replacement charges may apply.

1. Using stud finder examine substrate and check for studs.
2. Layout and mark holes for the first End Snap Bar making sure it is plumb. All further dimensions rely on the first bar.
3. Set drywall anchor for screws if needed.
4. Anchor first Snap Bar and set second Bar parallel to the first and on with the remaining Snap Bars.
5. Position and snap panels into the Snap Bars starting with one corner.
6. After all panels are snapped in assembly is complete.
