ENGRAVINGS
METAL COLLECTION

“As we explored new ways of working with our metals, we found that engraving patterns into the surface added a stunning visual quality that we can envision in any number of applications: walls, exterior cladding, column covers... plus the many ways we know our customers will come up with. We're really excited about the possibilities for Engravings, and we hope you love it as much as we do.”

– Murray Sandford
CEO of Móz Designs

ENGRAVINGS

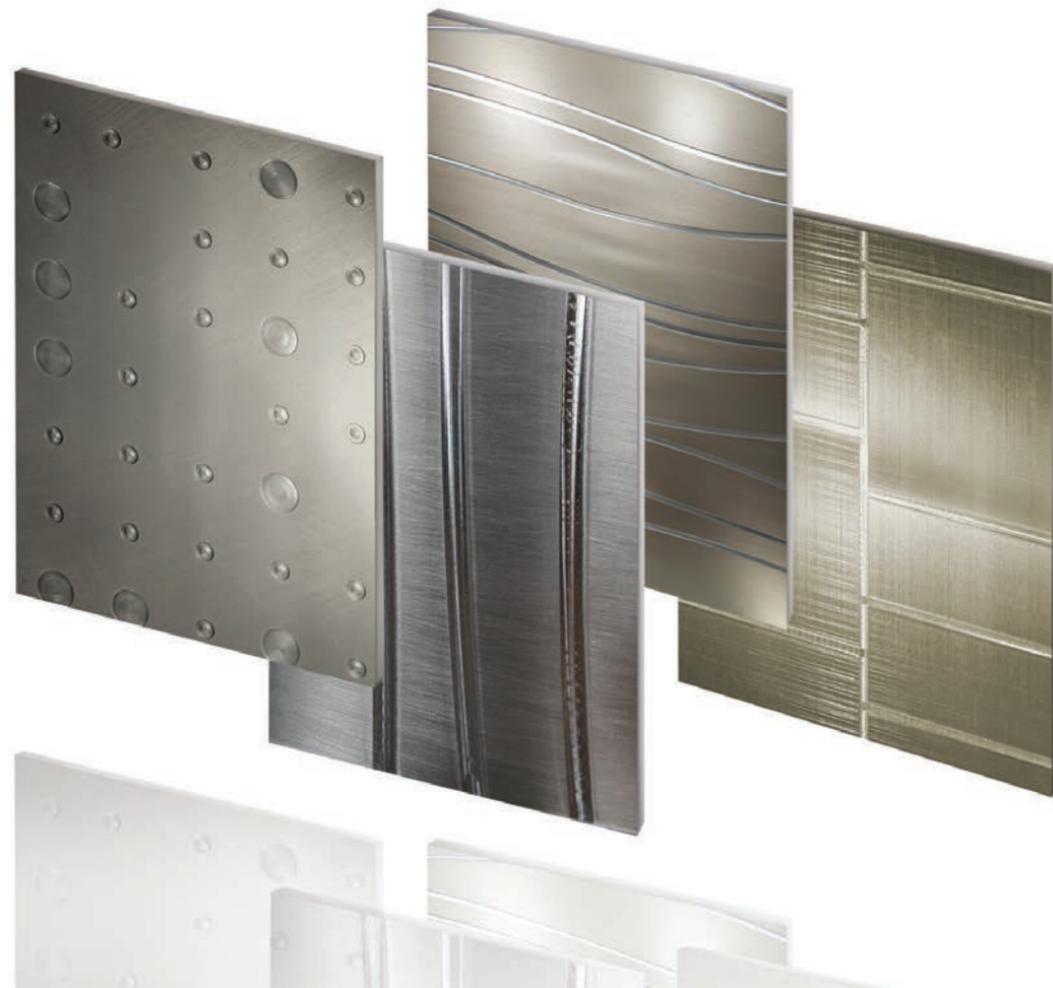

A sophisticated new surfacing solution for interior and exterior applications...explore a new world of mood, dimension and texture.

A revolution in metal.

Móz metals can't be pinned down to one color or hue; they are alive, dimensional, reflective, luminescent. Responsive to light, changing throughout the day, full of nuance.

ENGRAVINGS is both an evolution and a revolution in the Móz aesthetic. We've added the new dimension of texture — with engraved patterns in solid aluminum plate — for a whole new world of depth, durability and beauty.
