

# Trims and Framing

For Móz Metal sheets

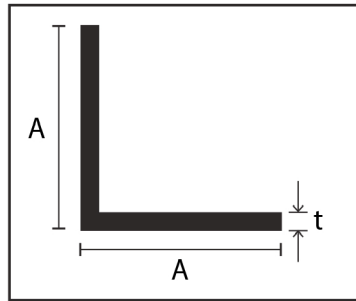

We offer three ways to complete an installation of Móz Metal sheets with Aluminum Corner, Seam, and Edge Frame Trims. Pre-finished in a Moz Classic or Powder color to match, trims come ready to cut and adhere in the field to cover joints, corners and edges for a more finished look.

For all other collections we can provide trims in a coordinating color.  
All Trims are sold in conjunction with Móz Metal sheets and not sold separately.  
Please contact us for pricing, minimum orders and lead times.

## Aluminum Corner Trim

Cap corners to allow for flexibility when field cutting. Also great for use in high traffic areas. Can be glued or hardware fastened.

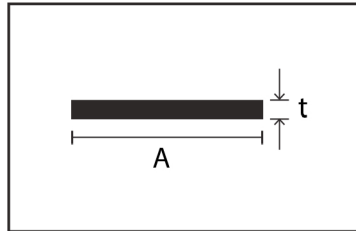

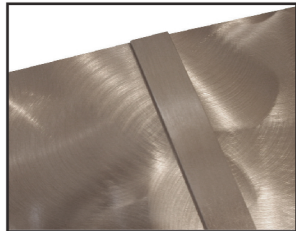

(A) Width	(t) Thickness
1"	0.125"
1.5"	0.125"
Available in 8' and 10' lengths	

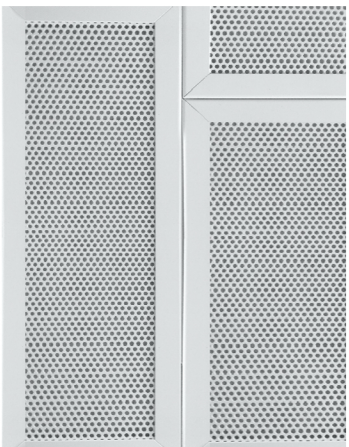

## Aluminum Seam Trim

Cover seams to create cohesion between directional patterns or create a framework appearance. Can be glued or hardware fastened.

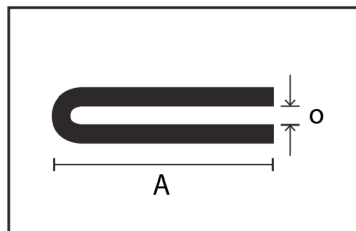

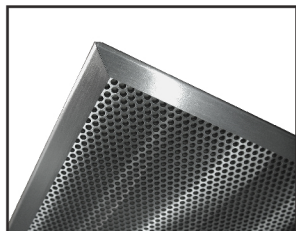

(A) Width	(t) Thickness
1"	0.125"
Available in 8' and 10' lengths	

## 3/4" Aluminum Edge Frame Trim

This trim sleeves the serrated edge of our perforated metals for a clean framed look. Great when used with standoff hardware.

(A) Width	(o) Opening
0.75"	0.063"
Available in 8' and 10' lengths
