

## Expansions to Laser Cut Metal Solutions

---

Floor-to-Ceiling Architectural Metal Available in NEW Laser Cut Patterns

**OAKLAND, CA** — From wall and ceiling features to partitions and railing infill panels, the Laser Cut collection is where aesthetics meet function in dimensional metal solutions.

With the Laser Cut collection by MóZ, designers can elegantly divide spaces with a reflective natural metal or a bold pattern using a durable and cost-effective material. This versatile collection has many uses – from an interior partition or feature wall to a stunning exterior facade. Designers are invited to collaborate with MóZ's team to create custom metal applications for retail, corporate, healthcare, residential, or hospitality projects.

The Laser Cut collection now boasts 12 standard patterns with the ability to customize the size and shape of the cutouts to control the amount of light and flow through space. The newest patterns include geometric Shattered, three-dimensional Netting and retro Loops, Celestial moons, and modern Lines. These patterns are laser cut out of solid-core 3/16" aluminum 5052 material in 4' x 8' standard sheet sizes.

The collection can be paired with any of Móz's handcrafted grains and glazed with a variety of interior and exterior finishes. From wall and ceiling features to partitions and railing infill panels, the Laser Cut collection bridges aesthetics and function—all at a competitive price point, providing an opportunity to integrate dimensional metal materials into any project.

Móz Metals and Architectural Products are 100% USA designed, sourced, and manufactured with LEED points available for recycled content. Optional add-ons include custom thicknesses, custom sizes, trims and framing for seams, corners, and edges in a color to match.

## About

---

Móz designs and fabricates contemporary architectural metal products out of Oakland, California. Our collection of sophisticated materials and patterns—including gradients, metallics, colors, and neutrals—are the result of continuous experimentation with cutting-edge tools, engravings, and equipment.

Móz redefines metal surfacing using a delicate balance of texture, grain, and color to create unique architectural metal products crafted for industrial, commercial, and residential markets—from large-scale corporate projects to one-off surface applications. Móz's innovative materials, products, solutions, and dedication to customer service help clients achieve their designs through quality metals.
