Forward-Thinking Architecture meets Metal Solutions: MÓZ Designs Adds Texture and Dimension to Three New Hotels

Hyatt Centric in Mountain View, Marriott Marquis in San Francisco and the Carte hotel in San Diego showcase MÓZ unique hospitality solutions

Showcasing their ability to transform any hospitality setting into a welcoming modern space, MÓZ Designs' metal solutions were used across three recently launched hotels in California. For the Hyatt Centric located in Mountain View, designed by [HBA Santa Monica](#), MÓZ provided copper colored perforated metal sheets with a custom pattern created from a photograph of Hetch Hetchy—a water-reservoir within Yosemite national park. The result is a stunning, copper backdrop, fully backlit and featuring custom perforations arranged to subtly depict an image of Yosemite, providing the ideal rugged counterpart to the lobby's minimalist, geometric wallpaper. The Hyatt Centric Mountain View was built to LEED Silver standards, with an emphasis on sustainable land use, resource conservation and waste minimization. This is in line with a company focus on sustainability at MÓZ, where all metals are sources domestically, and manufactured in their 100% solar-powered factory in Oakland, CA.

For the Carte Hotel in San Diego, designed by [The Manchette Studio](#), Móz created laser cut metal room dividers and decorative wall art. The dividers show a geometric pattern that creates playfulness while allowing the abundant natural light to disperse throughout the space. With furniture elements adding pops of color to the space, Móz room dividers, partition screens and wall art set a timeless, bright, and welcoming tone.

Creating a design that emanates technological possibility and contemporary luxury, Móz created rolled metal surrounds for the columns in the Marriott Marquis in San Francisco showing off their Moonlight gradient with a subtle linen grain adding texture, topped with Durafilm for added durability in the high-traffic space. The precise application turns the indispensable support columns into soft focal points, adding effortlessly to the hotel, designed by [Parker-Torres](#).
