Navigating Through The New Normal While Maintaining Distance
Móz Offers New Dividers for a Variety of Environments

(Oakland, CA) August 2020 - Móz Designs, an award-winning market leader in the metal fabrication space for over three decades, is now offering Dividers—helping to navigate through the new normal while maintaining distance in hospitality, healthcare, retail and workplace settings. Known for their signature precision Laser Cut, Perforated, and Engravings, Móz is now expanding their portfolio to include an acrylic collection, creating dividers that are both protective and solidly safe. Móz offers colors and finishes that are highly durable and easy to clean, suitable for high traffic areas and rigorous cleaning procedures.

Móz is offering dividers that can adapt to their context, available either curved to fit or flat, mounted by posts, cable, or in a frame—suitable for a light-touch application or as a room-dividing statement. The dividers can be engraved, backlit, or imprinted with on-brand graphics or imagery. They are available in aluminium that can be laser cut or perforated, or as an acrylic application in a clear or frosted format.

Each application arrives ready to install; all panels and hardware are included to help save time on installation. The dividers make it easy to redraw a floor plan through noninvasive means, with a low time spend, and minimal costs. For example, the Post Dividers can connect floor-to-ceiling with round or square posts, with the option to choose from a gripper style attachment or an angle mount to minimize visible hardware and spacing between panels. Setting boundaries and helping navigate flow, the dividers can be installed floor-to-ceiling, to a pony wall, or used to enclose an existing opening.
Minimizing hardware, and optimizing cleanability, Moz dividers are a safe and aesthetically appealing reply to the challenges 2020 has brought collective environments.
About Móz Designs
Metals + Architectural Products
Móz designs and fabricates architectural metal sheets, columns, walls, and room dividers in Oakland, CA. Using a unique balance of color, texture, and grain, Móz redefines metal surfacing materials to create architectural metal products for commercial, hospitality, entertainment and retail markets, from large-scale exterior installations to easy-to-assemble products and surface applications. Móz’s innovative products, solutions, and dedication to customer service help designers achieve their vision on time and on budget.
