Three-Dimensional Metal Surfacing Solutions Offer a New Layer of Design

Móz Designs Expands Engravings Collection with Six New Patterns

(Bay Area, CA) April, 2023 — With over thirty years of custom fabrication experience, award-winning metal experts, [Móz Designs](#), is expanding their signature Engravings Collection with six new patterns. Offering a three-dimensional decorative metal surfacing solution that merges digital technology with skillful craftsmanship, the collection's latest iteration showcases sophisticated, geometric designs that bring new definition to walls and columns suitable for interior and exterior applications.

Móz's six new Engravings patterns—Particle, Fractured, Parallel, Merge, Tangle, and Uprise—are a refined group of structural, dimensional graphics that capture artisan detail while minimizing labor and maximizing durability. Seamlessly melding into the metal panels' selected finishes, the Engravings Collection brings new possibilities to the limitations of traditional tile. The modern patterns produce a greater sense of depth and movement with a range of angular and curved configurations. While Merge, Tangle, and Uprise are designed to repeat with consistent symmetry, Particle, Fractured, and Parallel are available in a three panel series that bookend each other, granting designers the opportunity to mix and match the coordinating patterns in a number of interchangeable combinations for a unique, large-scale installation.

Made from renewable aluminum, the Engravings Collection offers a highly durable, easy to clean metal material suitable for high traffic areas, providing a low-maintenance solution that doesn't compromise visual intrigue. Utilizing of the strongest and most sustainable materials in the world, the engraved aluminum sheets and column covers combine thoughtful design with the resilience and dependability Móz Designs is known for.

Móz aims to make installation as seamless as possible by using a thicker gage 0.090" aluminum so panels can be installed in full 4'x8' and 4'x10' sheets instead of individual tiles, saving installation time in the field. The collection is available in over 20 standard Powder Coat hues with custom color availabilities from Móz's other signature collections—merging the new patterns with some of the manufacturer's most popular finishes.

Metals + Architectural Products

The Engravings collection is available as a Sheet for direct application to walls—complete with matching trims for corners and transitions—or as a material of choice on MÓZ’s Column Solutions. For a more turnkey approach, the collection is also offered as part of MÓZ’s Terrace Panel system for a ready-to-install product that minimizes on-site labor and stretches your budget. MÓZ Design’s commitment to quality metals and products that are unique in design, craft, and execution make them the market leader in metal fabrication.

About MÓZ Designs

Metals + Architectural Products

MÓZ designs and fabricates architectural metal sheets, columns, walls, and dividers in Bay Area, CA. Using a unique balance of color, texture, and grain, MÓZ redefines metal surfacing materials to create architectural metal products for commercial, hospitality, workplace, transportation, entertainment, and retail markets, from large-scale exterior installations to easy-to-assemble products and surface applications. MÓZ’s innovative products, solutions, and dedication to customer service help designers achieve their vision on time and on budget. The MÓZ business, a wholly-owned subsidiary of Armstrong World Industries since August 2020, operates independently but collaboratively with AWI.
