## Laser Cut Metal Installation Pays Homage to Iconic Urban Development Plan

Móz Designs brings historic L'Enfant map to life through backlit metal solutions

(Washington D.C.) January 2024 —Móz Designs' latest laser cut wall installation features a backlit metal depiction of the iconic L'Enfant urban plan developed for President George Washington in 1791. Collaborating with Rogers Partners Architects, the custom laser cut design reflects Washington D.C.'s historical urban development while unifying the lobby and connecting the new and old. Customizing the otherwise standard commercial space, the map is the distinguishing design element in the high-traffic entryway.

Móz Designs' Backlit Laser Cut Keyslot Wall & Ceiling Panels span over 5,000 total square feet in the newly renovated lobby. Bringing Rogers Partners Architects' vision to life, Móz Designs modified the artwork provided to ensure the rigidity of the panels and continuity of the design along the wall and ceiling with lighting consultation for the best glow. Showcasing a custom powder-coat finish, the entire system was designed and manufactured ready for installation upon arrival with prefabricated panels, mounting brackets, lighting, and acrylic backing to create an internal backlit glow. Móz Designs' laser cut capabilities create a dynamic, cutting-edge atmosphere while maintaining material integrity and durability.

## **About MÓZ Designs**

### **Metals + Architectural Products**

MÓZ designs and fabricates architectural metal sheets, columns, ceilings, walls, and room dividers in Bay Area, CA. Using a unique balance of color, texture, and grain, MÓZ redefines metal surfacing materials to create architectural metal products for commercial, hospitality, workplace, transportation, entertainment, and retail markets, from large-scale exterior installations to easy-to-assemble products and surface applications. MÓZ's innovative products, solutions, and dedication to customer service help designers achieve their vision on time and budget. The MÓZ business, a wholly-owned subsidiary of Armstrong World Industries since August 2020, operates independently but collaboratively with AWI.
