

Metals + Architectural Products

A Metal Surfacing Material Inspired by Nature Introducing Four New Colorways

Oakland, CA (June 2016) – A visually striking fusion of color and texture, the Blendz Patina Collection from MÓZ Metals & Architectural Products, is expanding with four new color offerings inspired by nature. The Patina Collection is the newest addition to the MÓZ portfolio of dynamic metal surfacing materials. Featuring variegated tones of copper, wood, water and other earth tones, the Patina Collection adds dimensionality and natural beauty to walls, columns, and facades in a lightweight easy-to-install metal material.

The Blendz Patina collection features a range of colorways and a choice of rich textural grains for a stunning metal finish. Blendz Patina's natural aesthetic creates visual interest in interior and exterior installations, including wall coverings, ceilings, column covers, elevators, and more. MÓZ metal products are easy to clean and durable offering a long lasting lifespan that make their materials the perfect addition to commercial spaces such as airports, healthcare facilities, restaurants and retail environments.

The Blendz Patina Collection is fabricated from solid core aluminum and is available in thicknesses ranging from .040" to .125" with two standard sheet sizes of 48" x 96" and 48" x 120". Custom sizes are also available. All MÓZ metal products are rust-resistant and offer consistent color integrity, which is the result of a carefully curated handmade design process by a team of local artisans. MÓZ metals are manufactured from recycled aluminum and contribute to LEED 2.0 MR Credit 4 – Recycled Content.

About Móz Metals & Architectural Products

Móz Metals and Architectural Products designs and fabricates contemporary metal surfaces in Oakland, CA. Móz' collection of unique materials and patterns, including gradients, metallics and neutrals are the result of continuous experimentation with new tools and techniques. Móz craftsmen delicately balance texture, grain and color to create unique architectural metals for projects of all sizes - from large scale technical projects to small installations. Móz' products, capabilities and dedication to customer service help clients achieve their design intent on time and on budget.
